Summary

Fourth year B.E. Computer Science Engineering student with a strong foundation in C/C++, UI/UX, and secure software practices. Experienced in building user-centric interfaces and writing efficient, reliable code. Eager to apply these skills in real-world engineering environments through hands-on project involvement. Committed to learning, solving problems systematically, and contributing to high-standard, precision-driven teams.

Education

2022-2026	Bachelor of Engineering in CSE, MVJ College Of Engineering, Bangalore CGPA: 8.30
2022	12th, KV NAL, Bengaluru

Skills

Languages	Python, C, C++, Java
Development	HTML, CSS, Bootstrap, AWS
UI/UX Tools	Figma, Canva, Adobe XD
Frameworks/Tools	Flask, Bootstrap, Git, GitHub, VS Code, Arduino IDE, Postman
Databases	MySQL
Other	CI/CD Concepts, Basic Electronics

Experience

CIG Department, Indian Space Research Organization (ISRO)

Intern - 17 November 2025 to 31 December 2025

- Development of web application using MVC architecture for HRCG (Java, MVC, JSP, HTML, CSS, JavaScript)
- Worked with secure internal systems and organizational workflows, following industry-grade standards for documentation, testing, reliability, and SDLC practices.

Centre for Advanced Systems Development and Integration Centre (CASDIC), DRDO

Inten - July 2025 to August 2025

- Contributed to secure data handling research by exploring and testing hashing techniques, database systems, and algorithm optimization aligned with defense-grade requirements.

Webexa Digital

Graphic Designer Intern - July 2025 to September 2025

- Designed user interfaces and marketing creatives using Figma, Canva, and Adobe tools in collaboration with development teams.

Social Swipes

Website Developer Intern - 1st August 2025 to 31st August 2025

- Developed and customized Shopify themes, and built responsive UI components using HTML, CSS, and JavaScript. Responsible for assisting in Designing, Updating, and Maintaining Website.

Projects

AI-Driven DevSecOps Pipeline

[\(Demo\)](#)

Designing an automated CI/CD pipeline integrating AI-based threat detection using SonarQube, OWASP ZAP, GitLeaks, Trivy, and Falco to identify and prevent security vulnerabilities during software deployment.

Tech Used: Python, CI/CD, Docker, Security Tools

Skill Swap Platform

[\(Demo\)](#)

Developed a platform for students to exchange skills and collaborate on projects. Implemented using Flask, JavaScript, Bootstrap, and MongoDB Atlas with features like profile matching, collaboration requests, and secure authentication.

Tech Used: Flask, JavaScript, MongoDB, Bootstrap

NestFinder

[\(Demo\)](#)

A user-friendly rental and PG discovery app for students and professionals. Integrates map-based search using Python mapping libraries, Flask backend, and a responsive frontend built with Next.js. Allows users to find nearby rental options with filters and availability status.

Tech Used: Python, Flask, Next.js, Google Maps API

Smart Waste Segregation Bin

[\(Demo\)](#)

Developed a smart bin using IR, moisture, and proximity sensors to classify waste as wet, dry, or metal.

Integrated with Arduino UNO, stepper, and servo motors for automated sorting and disposal.

Tech Used: Arduino UNO, IR Sensor, Proximity Sensor, Moisture Sensor, Stepper Motor, Servo Motor

Activites

Design Team Member - VertechX 12.0, MVJCE

Designed event posters, social media graphics, and contributed to the UI/UX of tech event interfaces.

Collaborated with a cross-functional team to deliver visually engaging materials for the annual college tech fest.

Languages

English – Fluent
Hindi – Native
Kannada – Basic

Certificates

- Communication Skills Training – 36 hrs, Seventh Sense Talent Solutions [Link](#)
 - Aptitude Training – 60 hrs, Seventh Sense Talent Solutions [Link](#)
